

HPS15ARW Cutting Tweezers With ESD Epoxy Coating and Short Rounded Blades

Type 15ARW High-Precision Cutting Tweezers are designed for applications that involve stripping small materials or performing fine cuts. The short, rounded blades provide **maximum visibility and are engineered to deliver maximum cutting force**, making them suitable for stripping small, soft metal strands (e.g., copper). The Epoxy Coating provides ESD protection, making the tweezers suitable for cutting electronic components and for use in cleanroom environments.
